

STUDENT LIFE

It's when *you're* walking with *your* friends in the midst of a sea of purple. *You're* sweaty, hot, and out of breath, but that doesn't matter because *you* feel the school spirit in *you* as *you* make *your* way downtown for the Homecoming pep rally. It's when they call *your* name out on Award's Night, and *you* feel the satisfaction and pay off of all those late nights and early mornings. It's when *you're* packed in the commons area for Winter Ball feeling the music move through *your* body, and *you*

feel as if life could not be any better. It's when *you're* in a tight and heavy dress at Prom, but *you* move past the uncomfortableness because this is *your* night, and it's been *your* dream. It's when *you* hop on stage at graduation, and they give *you* that piece of paper that *you* hold onto so tightly because it's a physical representation of all the long years. These are *your* moments. This is when *you* feel at top. This is when *you* feel *your* best. This is when *you* feel golden.

LIGHT IT UP. After mixing soap, gas and water to create bubbles, chemistry teacher *Mark Sugimoto* lights them on fire. "I like doing labs/ because they are exciting and you get to blow things up," said *Sugimoto*.

LAST CHANCE. This being their Senior year, Ryan Woitalewicz (12) and Emily Loy (12) go all out for the Homecoming decorating competition. They hung up sign for each Senior locker and even made a makeshift chariot to follow along with their theme inspired by the Hunger Games.
